Professional Malpractice

A primary area of Barnwell Whaley's litigation practice involves the counseling and defense of professionals. We represent:

- Physicians
- Nurses
- Dentists
- Hospitals
- Health care providers
- Attorneys
- Law firms
- Architects
- Engineers
- Real estate agents and brokers
- Accountants
- Insurance agents
- Property managers
- and other professionals in the defense of malpractice actions, errors and omissions, and professional disciplinary actions.

Barnwell Whaley attorneys work to mitigate the liability of our clients, providing counsel at every turn. Our research team analyzes each case, assessing exposure to each professional personally and professionally, as well as how the risk might affect the future of your business.

As attorneys guide clients toward appropriate resolution techniques, they find that in some cases mediation and arbitration is an option. However, if litigation is necessary, the Barnwell Whaley professional malpractice team of nationally recognized litigators and nurse-attorneys takes aggressive, thorough action to provide an effective and efficient defense.
